DETAILED ACTION

Drawings

- 1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.
- The drawings are objected to under 37 CFR 1.83(a) because they fail to show "the plurality of select transistors are arranged substantially symmetric with respect to the memory cell array" as described in the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d). Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several

views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Page 3

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "the plurality of select transistors are arranged substantially symmetric with respect to the memory cell array" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an

Art Unit: 2818

application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 5. Claims **1 4** are rejected under 35 U.S.C. 103(a) as being anticipated by Ichige et al. (US Patent no. 6,845,042).
- 6. Regarding claim 1, Ichige discloses a layout of a flash memory having symmetric select transistors, comprising:

A memory cell array (fig. 41);

A polysilicon gate 21 (fig. 24; col. 20, lines 19 – 24 and 45 – 50) extending in a direction perpendicular to the memory cell array (fig. 30; note: polysilicon gate of the SGD1, SGD2, SGS1 and SGS2 are in perpendicular to the control gate of the memory

Art Unit: 2818

cell array M0 – M15) with a plurality of pairs of Ss/Ds: SUD and SUS (fig. 30) arranged at two sides thereof for forming a plurality of select transistors; and a wire connecting the plurality of Ss/Ds of the plurality of select transistors and the Ss/Ds of the memory cell array.

Regarding claim 2, Ichige discloses the wire (conductive) comprises a segment parallel to the polysilicon gate (note: when the polysilicon gate SGD2 and SGD1 being connected).

Regarding claim 3, Ichige discloses a layout of a flash memory having symmetric select transistors, comprising:

A memory cell array (fig. 41);

A polysilicon gate 21 (fig. 24; col. 20, lines 19 – 24 and 45 – 50) extending in a direction perpendicular to the memory cell array (fig. 39; note: polysilicon gate of the ST11, ST12, ST21 and ST22 are in perpendicular to the control gate of the memory cell array M0 – M15) with a plurality of pairs of Ss/Ds: SUD and SUS (fig. 30) arranged at two sides thereof for forming a plurality of select transistors; and a wire connecting the plurality of Ss/Ds of the plurality of select transistors and the Ss/Ds of the memory cell array; wherein the plurality of select transistors are arranged substantially symmetric with respect to the memory cell array (fig. 30).

Regarding claim **4**, Ichige discloses metal (conductive) wire extending from the memory cell array toward the polysilicon gate for connecting the plurality of select transistors to a bit line of the memory cell array (fig. 39).

Application/Control Number: 10/643,876

Art Unit: 2818

Conclusion

Page 6

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Long K. Tran whose telephone number is 571-272-1797. The examiner can normally be reached on Mon-Thu.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Nelms can be reached on 571-272-1787. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
